

## Three phase solid state stabilizers

Available for power range **5 kVA** up to **170 kVA**.

Input voltage:	165 ... 255 V *
Output voltage:	220V +/- 6% *
Total correction time:	less than 20 ms <i>to any voltage deviation</i>
Operating frequency:	46 ... 62 Hz *
Load type:	all types of loads
Energy efficiency:	96 % typical
Total harmonic distortion:	less than 2 %
Ambient temperature:	-10 °C.....+ 35 °C <i>In environments with higher temperatures the output power decreases accordingly</i>
Noise rejection:	available
Spike suppression:	available
Relative humidity:	max. 92% ( <i>not condensed</i> )
Audible operating noise:	less than 45 dB (A) / m

\* Other specifications on request.
